MAKE THE MOST OF SMART SOLUTIONS

The charming location of Portico Marina is just where the pleasure starts. Apartments by the Lake embrace an architectural vision to ensure your comfort and safety every day.

The intriguing, organic form of the Portico Marina building attracts the eye, but the functionality goes well beyond the smart looks. The well thought-out architecture matches the surrounding environment and the striking façade makes Portico Marina perfectly harmonise with the green landscape of Zegrze. Situated along the shoreline and equipped with appropriate architectural solutions, every apartment boasts a direct view of the lake.

The modern look and feel of the building is softened by natural wood cladding elements which add a cosy touch to make your residence at Portico Marina your safe harbour. The glazed façade on the waterfront side opens to a splendid landscape while the northern, more built-up part, protects the privacy of the residents. This contributes to the energy efficiency of the building as well: by reducing the cost of heating and bringing daylight into lift halls and stairwells.
